

S.B. Devi Charity Home is conducting Health Check-up Programme in your esteemed school for the last eleven years. We are grateful to you, other faculty members, staff and the students for making this programme a grand success.

The main aim of our School Health Check-up Programme is prevention of diseases through various awareness programmes, Individual and group counselling sessions. Our efforts have definitely improved to some extent the health status, especially in the field of dental health, nutritional status, personal hygiene and general health.

We also spread knowledge on HIV/AIDS through several Interventions. As School children are a “Window of Hope” into the future, and education is an effective “Social Vaccine” against HIV/AIDS. We are proud to say that we have successfully conducted Peer Educator Training Programme amongst different high school students for the last 4 years.

This year too we organized a Peer Educator Training on HIV/AIDS on 23.08.13 in our Project Building. 10 High School Students participated.
