

Amritayan:

On the 19th of July'07 we did a health check-up programme at “Amritayan” (a school for the mentally and physically challenged children). This programme was organized in association with Rotary Club of Calcutta East Central. On the same day we also did a health check-up for the students of Kolkata Municipal Cooperation Primary school which was in the same building. This was requested by the headmistress of this school. The whole SBDCH team conducted the programme. Apart from health check-up we did General Health and Nutritional counselling to the children as well as the teachers. All the students of Amritayan had undergone blood sugar (random) and Hb% (Haemoglobin).
